Botanica del Jibaro & Project Mooncircle present:
»Calderas of Mind« - CD
with Seven Star, CYNE, Epstein, Serum, Climber, Mr Cooper, Soarse Spoken,
Manuvers & Deviant

Strolling in the eternal circle of being and becoming, driven by emotions and
the will to give it an expression.

A kind of sound for all senses, music which does not know about limits. The
calderas of mind ep is standing for the negative battering things which take
place in our heads. Acts like Soarse Spoken, Manuvers, Soloman Spectrum,
Epstein, Seven Star, Serum, Miles, Livee', Climber, Deviant & Gordon are
included and their sound is bringing the flavor into this collaboration. The CD
included a video clip by the Beta Bodega Coalition's graphic guerilla, La Mano
Fria.

Music is the way we use to convey the power and beauty of our own world
containing all our sorrow, love and experience.

The artwork is a cooperation too, between La Mano Fria, Andy K. & Gino Fuchs.
They put a beautiful frame around the music and make it shine. These artists
are well known for their amazing talents in the way of design and it's an honor
for us to get their support.
